

BIDBAZAR

GET READY TO BID AND WIN!

THE THRILL OF THE AUCTION IS JUST A CLICK AWAY

Create an app or website in which users should be able to create posts for auctions and other users can bid for the product

User interface for users to register

User interface for user's order history / previous purchases

User should be able to create auction for selling a product or service with an expiry timeline

Home page should list all auctions with most bids for a current auction

Categories for auction can be *Mobiles, Automobiles, Real Estate, Electronics, etc.*

Bidder can post questions for product on posted auction, auction author should be able to answer questions

Based on past bidding patterns on how frequently product is bided and sold, decide an idle expiry deadline

Interface for admin to identify the category wise products based on maximum sold value, number of bids, and ratings

Reverse Auction Capability to bid in decreasing order for government tenders
